PicoDisk Power

PicoDisk Power is the compact and portable USB 2.0 high-speed mass storage device with a capacity up to 4 GB acting as a usual hard drive.

The floppy disk era is now over; you can now read and write any file using your PicoDisk Power; just plug the device into the USB port of your computer and a new disk is available and enumerated among the system resources.

Features:

Storage Capacity: 1 GB – 2 GB – 4 GB available

Security: password protection thanks to the software utility included in the package

Partition: the volume can be split into a protected area and a free access area

Compact size: 80x23x9 mm

Portability: no battery or external power supply required

Ease of use: Plug&Play via USB port

Reliability: - waterproof (IEC60529 IP67)
 - shock and dust resistant
 - rewritable up to 1 million times

System requirements:

Hardware requirements:

AMD or Intel Pentium 133 MHz or better

USB 1.1 or USB 2.0

Software requirements:

Windows 98/ME/2000/XP, Mac OS 9.1 or higher

Linux Kernel 2.4 or higher

Software driver:

PicoDisk Power is totally driverless on all the above listed operating systems with the only exception of Windows 98 requiring the specific driver supplied in the package

Technical specifications:

- Read data transfer rate (on USB 2.0): up to 24MB/s
- Write data transfer rate (on USB 2.0): up to 14MB/s
- LED: green (supply on, connected)
         red blinking (access to data)
- USB bus powered (4.5V-5.5V)

Typical applications:
- **Storage and transfer of large multimedia data files**
